Reporting Accomplishments to NIH

Why do you need to report your accomplishments?

- Core and project directors use it for their annual Research Performance Progress Report reporting to our funders
- The Research Translation Core (RTC) and Community Engagement Core uses it for newsletters, website, NIH reporting, blog posts, and social media
- The Training core uses it to report back in CareerTrac.
- Most Importantly, the SRP and PNW-CTEHR programs at OSU count on this information for the future of our Center!

Where/How do you report?

Use these links at any time. As well as when the RTC sends out monthly reminders. Regular reporting helps ensure that items aren't forgotten and missed.

- **PUBLICATIONS, POSTERS, PRESENTATIONS, AND AWARDS FORM**

    o For all recent **publications, posters, and presentations** given by SRP, T32, and EHSC trainees, faculty, and investigators
    o For any recent awards and appointments to **advisory boards/panels.**

    https://beav.es/5Sq

- **RESEARCH HIGHLIGHTS AND STAKEHOLDER ENGAGEMENT FORM**

    o For initiatives conducted with stakeholders, research partners, and the scientific community at large and exciting or groundbreaking activities
    o Includes outreach and engagement with diverse **stakeholders, media interactions, educational materials, cross-center collaborations, new data sets/repositories, patents, or technology transfer.**

Tips for reporting

- Add links, images, and other supplemental info to help tell the story. This increases your chances of being highlighted.
- When in doubt, send it in (include as much information as possible).
- Submit Publications is when the paper is accepted and the DOI is published. Check the website publications before you enter them on the form. If it's on the website, we have a form entry for it already and there is no need to submit it.

https://ehsc.oregonstate.edu/publications

Citing the Center(s)

- Always double check with your PI
- Cite the appropriate centers in **all publications, posters, and presentations**.
- If you forgot to cite upon publishing, it can still be fixed after the fact, but it takes more time (reach out to Shawn Tucker for help with this)
- Open Access is a requirement with papers that cite NIH centers. Contact your PI or Shawn Tucker you need help making sure this happens.

There are 3 centers: If your work contributes to that center, copy the information below into your manuscript.

- **Superfund Research Program (SRP P42)**
  - Research reported in this publication was supported by the National Institute of Environmental Health Sciences of the National Institutes of Health under the Oregon State University Superfund Research Program, Award Number P42 ES016465. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

- **T32 Grant Research Projects (T32)**
  - Research reported in this publication was supported by the National Institute of Environmental Health Sciences of the National Institutes of Health under the Oregon State University Superfund Research Program, Award Numbers P42 ES016465 and Oregon State University NIEHS Ruth L. Kirschstein NRSA Institutional Research Training Grant T32 ES007060. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

- **Pacific Northwest Center for Translational Health Research (PNW-CTEHR)(P30)**
  - Research reported in this publication was supported by the National Institute of Environmental Health Sciences of the National Institutes of Health under the Oregon State University Pacific Northwest Center for Translational Environmental Health Research (OSU EHSC), Award Number P30 ES030287. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.
